

Hi everyone!

Almost one month of the new academic year has already passed. We hope everyone had a successful start and for those who have not been students for a while, it has been an easy adaptation to student life.

In this newsletter you will find updates about **SET LASER TAG**, **SET BORREL**, **AC-SET website** and the **SET GOOGLE GROUP**.

As you will read in the newsletter, AC-SET is asking for the help of people experienced in website design. If you are interested contact [us](#).

Do you also have some news or fun fact you want to share with all your fellow students, send it and we'll try to place it in our next newsletter. Enjoy reading and expect another next month!

The AC-SET (Activity Committee of SET).

SET student of the Month

Alberto Mario Striedinger Pinilla
Colombian- 23 years
SET 1st Year

Favorite food : Empanada (Colombian dish)

Favorite Dutch food : Kroket and cheese of course

Ecological footprint (footsize): 3 (out of 10)

Favorite place in campus: Climbing wall at the sportscenter

Most sustainable behavior: Biking

Stupidest behavior ever: too many. to pick one, getting too drunk and ending up dancing with a chair

Non-sustainable subject for you: Renewable energy sources (actually the lecturers)

Favorite Subject in SET Master Track: Technology for sustainable development

Life in three words: Eche y Que? (Hey what's up?)

SET LASER TAG

Do you want to have some fun with fellow students, and meet more people from SET?

Here is the opportunity: AC-SET is organizing a laser tag tournament for SET and SELECT students. More details will follow with an e-mail in October, keep an eye on your TU/e mailboxes.

The next SET-borrel will take place on **Thursday October 6th** in **Skybar** (architectural building **Vertigo**, in the basement) starting at **17:00**.

We would like to invite all of you for a drink, and to meet and socialize with other SET students and us.

Did you know that...

- Within 40 students of SET 2009, 4 dropped-out, 13 graduated, 23 still studying and many more are graduating soon.
- Physical transport phenomena is the hottest topic within the SET students.
- This year more SET students than ever are studying in the library and ICTheek.

WEBSITE

Almost all of the SET students are familiar with our website (<http://acset.isgreat.org/>). You can find old exams, information about the AC-SET and upcoming events on the website. Unfortunately, this website was not working within the campus of TU/e.

Now we are working on a solution for this problem, we have a new domain name, and we are rebuilding the website.

For the new website, we need help of people experienced in website design. If you are one of them, please contact us by sending an e-mail to acset@tue.nl.

GOOGLE GROUP

SET students are already defending their thesis. Some of them graduated already, most of them are going to graduate soon, and the contact with them would be lost soon for most of us, as the TU/e mail addresses will expire.

As we are glad to know each other from the day one and we would like to continue the same after we leave the university, AC-SET created a mail group to stay in touch with everyone. All SET students can register by their non-TU/e mails, by following this [link](#), or you can send your e-mail address to acset@tue.nl and we will add you to the group.
